

the IPv4 address of Router.

- Step 5:- Perform Step 3 and Step 4 for GENU Network. Router is connected to GENU by Interface Gigabit Ethernet 0/1. Set its IPv4 address as ~~192.168.1.4~~ 192.168.1.4 get the port status.

Step 6:- Now set the IP address of end devices connected to switch 1. Set default gateway as 192.168.1.4.

Step 7:- Check all the collection are done properly Green arrows would indicate proper connection.

Q2. Problem statement:-

Object: Show ^{LAN} connection using router.

Description:-

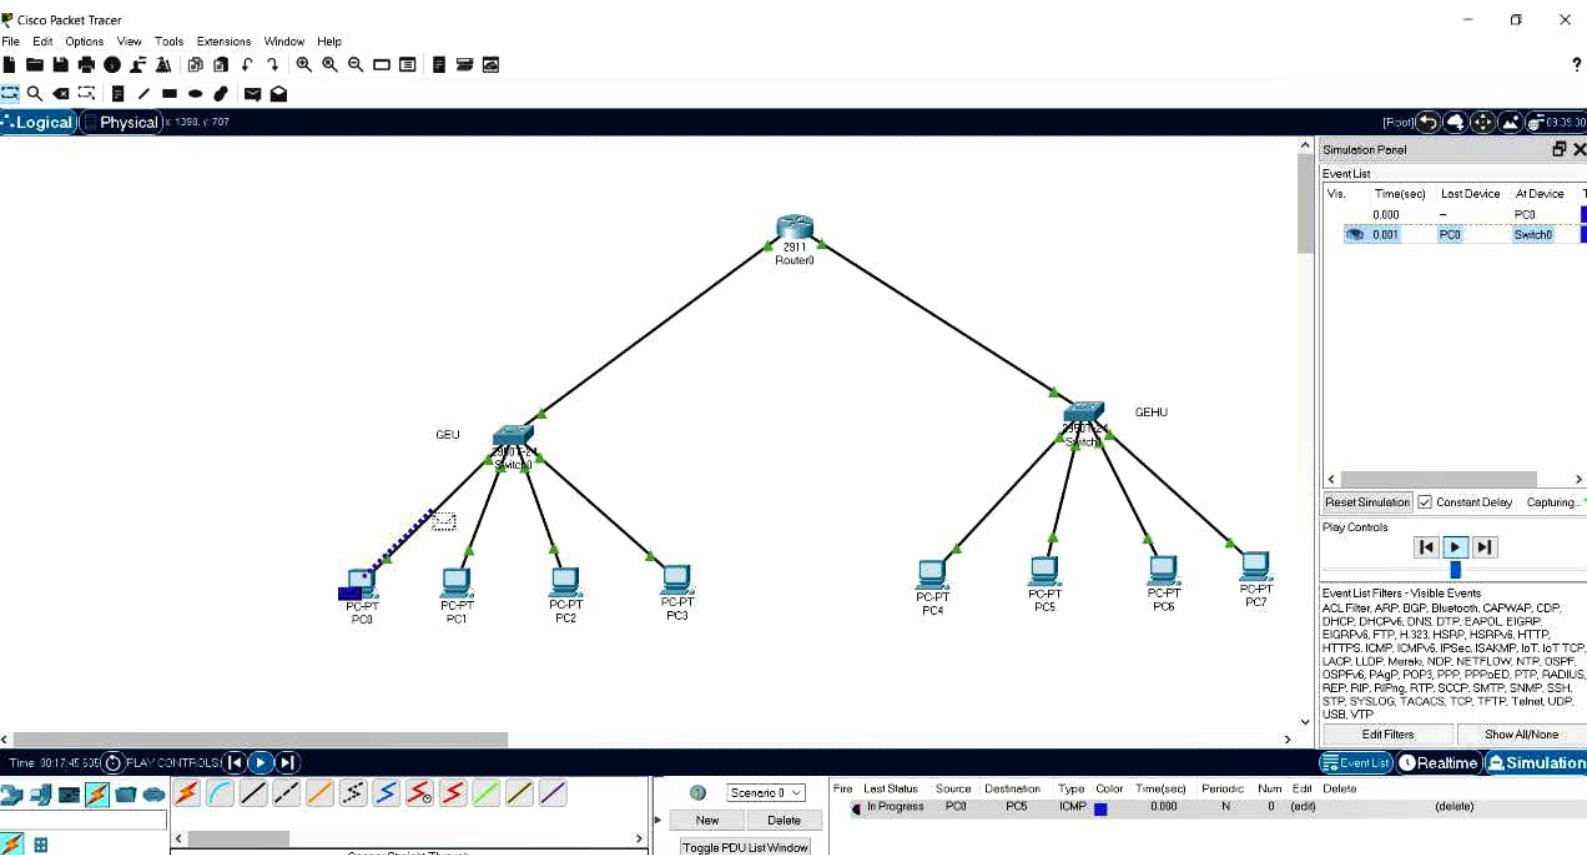

Step 1:- Create two LAN (GEU, GEM) using switch and make the connections between the end devices and that switch.

Step 2:- Connect both the switches to the router.

Step 3:- Router is connected to switch 0 by the interface Gigabit Ethernet 0/0. Set its IPv4

Address as 10.10.10.3 and check on the port status. This establishes the connection between Router and switch 0.

Step 4:- Now set the IP address of end devices connected to switch (GEU) set the default gateway of all the end devices connected to switch 0 as 10.10.10.3 which is
